OBJECTIVE

A Front End web developer, passionate about creating user centered and innovative user interfaces or websites.

WORK HISTORY

Profile: INFOTRIXS (Internship)   *(AUG 2023 – SEP 2023)*

- As an intern at Infotrixs, my domain was full stack web development.
- During internship I have successfully completed a mini project and a major project with my team to complete the internship.
- In mini project they assessed our skills and then assigned us to a major project. I had developed a simple calculator for mini project.
- Our major project was to create an all in one calculator including financial, health, algebra everything that user needs for calculations using front and backend.
- My contribution in major project was to create a scientific calculator and make routing in main app.js file to access the different pages dynamically.
- The Technology stack that I used to complete these tasks includes HTML, CSS, JS, Bootstrap, Node-Js, Express-Js , EJS templates.

Profile: OASIS INFOBYTE (Internship)   *(JAN 2023 – FEB 2023)*

- As an intern at Oasis Infobyte, my domain was web development and designing.
- During internship I have successfully completed 3 tasks to complete the internship. The tasks were like create landing webpage(front-end), Online portfolio page, Online unit converter page, etc.
- The Technology stack that I used to complete these tasks includes HTML, CSS, JS, Bootstrap.
- While doing internship I learned many concepts such as box model, color theme in CSS, page layout, structure of page. And most importantly I learned time management to stay on time.

EDUCATION

TRINITY COLLEGE OF ENGINEERING AND RESEARCH   *(JAN 2020 – JAN 2024)*
Course: BE-IT, SGPA: - 8.27

NMV HIGH SCHOOL AND JUNIOR COLLEGE   *(NOV 2018 – NOV 2020)*
Percentage: 80%(HSC)

DEOGIRI VIDHYALAYA DAULATABAD, A.BAD   *(JUN 2012 – MAR 2018)*
Percentage: 94%(SSC)

TECHNICAL SKILLS

- HTML
- CSS
- JAVA SCRIPT
- React-Js
- CPP
- OOP concepts
- SQL
- DSA
- Problem Solving

PERSONAL PROJECTS

BEAUTY-BEBO CLONE   *(FEB 2023 – MAR 2023)*

- This is an e-commerce website like Flip-cart, Amazon where you can buy any type of beauty product.
- I made a clone of Beauty-Bebo website to get an experience of how to design a website exactly similar to actual one using CSS so that to increase my command on CSS.

- Tech Stack includes HTML, CSS with BOOTSTRAP and JS etc.

ONLINE BLOGGING WEBSITE *(DEC 2022 – JAN 2023)*
- I made a blogging website during my online certification of full stack development.
- Basically, on my website user can write blogs and read the previous history of blogs created simply by entering relevant link on the page.
- Tech Stack includes NODE.JS with EJS templates (Back-end) for routing purpose and some CSS and HTML to beautify and structuring the web page(front-end).

DRUM KIT WEBSITE *(FEB 2023 – MAR 2023)*
- This website is an application of learning during online certification and made it happen.
- A website for fun and make you feel realistic as you can see and hear different musical instruments that you can actually play just by clicking on them or by pressing a particular key.
- Tech Stack includes JS, HTML and CSS with BOOTSTRAP, etc.

CERTIFICATES
- Python certification from Guvi, powered by Google   (13 AUG 2023)
- Full stack web-development Udemy certification   (10 DEC 2022- TILL DATE)
- Accenture developer virtual experience program   (7 OCT 2022)
- Artificial intelligence course (KJ-TCOER [IT]- DEP)   (24 MAR – 2 APR 2023)
